

ABOUT US

Applied Technologies Inc. is a leading provider of innovative technology solutions for the federal government. We have been at the forefront of groundbreaking technologies. As pioneers of the sonic anemometer, developed in 1978, our expertise and experience make us a trusted partner in the federal government space. We specialize in providing technology services such as automation, complex integrations, analytics, and data science that empower our clients to maximize their performance in the growing digital landscape. Our reputation of excellence is backed by our commitment to quality and reliable solutions and services for our customers. Our clients can be assured that we will continuously strive to provide innovative and cutting-edge products and services.

At Applied Technologies Inc, we believe in using our expert knowledge and experience to provide our customers with innovative technology solutions that meet their needs. Our team consists of experienced professionals committed to delivering top-notch service and support. We stay ahead of the curve by consistently researching the latest advances in technology, identifying cutting-edge products and services to offer our clients. Furthermore, our products have been tested and proven to be accurate and reliable. We take pride in our capabilities and in our commitment to providing our customers with quality results. We place customer satisfaction as our top priority and are confident that we will exceed their expectations.

OUR PRODUCTS

Ultrasonic Anemometers
Data Loggers
Data Packers
Flux Measurement Software
Eddy Covariance Systems
Meteorological Sensor Systems
Fast/Accurate Temperature Systems
